About

IT professional with 2+ years of experience in application/technical support and 2+ years working as a software developer.

Experienced working across application development, support analysis, troubleshooting issues through logs, APIs, cross-system debugging, and collaborating between development and client-facing teams.

My background combines multiple areas of software engineering and technical operations:

- ✓ Technical Support
- ✓ Application Support
- ✓ Functional & Technical Analysis
- ✓ Frontend Development
- ✓ Backend Development
- ✓ Linux Systems Administration

Currently interested in opportunities related to:

- ✓ Linux Systems & Infrastructure
- ✓ Technical Support
- ✓ Technical Analyst
- ✓ Application Support
- ✓ System Monitoring
- ✓ DevOps / Cloud (Junior roles)
- ✓ Full Stack Development

Alongside this, I've built hands-on skills in Linux administration, Nginx, and Docker through self-hosted infrastructure projects. I'm now growing toward Cloud/DevOps roles, combining my troubleshooting background with infrastructure and automation skills.

Work Experience

- **Full-stack Developer**

Freelance | June 2025 - Feb 2026

I contributed to various projects by applying my technical and organizational skills. Technologies: React, Flask & FastAPI.

- **Functional Technical Analyst**

[Avature](#) | June 2024 - April 2025

I used my analytical and technical skills to analyze requirements and development processes. I was the nexus between the developers and the client-facing team, defining the request's feasibility and estimating development effort.

Technologies: Twig, HTML, CSS, Gitlab.

- **Mobile Fullstack Developer**

[Devapp](#) | March 2022 - December 2023 | Part-time

I have participated in the creation and maintenance of mobile applications using React Native and Python Django frameworks. Some of the projects:

- [Publica Reader](#)
- [Emov Electric](#)
- [GSO Group Aerolineas](#)

- **Application Support Specialist**

[Scale Ai](#) | September 2021 - October 2023

Provided technical support for internal platforms by analyzing and debugging application issues through logs, user reports, and system behavior. Collaborated with engineering teams to identify root causes, escalate bugs, and implement fixes or improvements. Worked with APIs, configuration issues, and cross-system troubleshooting in a bilingual environment.

Technical Skills

Systems / Infra

- Linux (Ubuntu Server, Debian, Fedora)
- Nginx
- Web servers deployment
- API debugging (curl, logs)
- Basic networking (ports, DNS, reverse proxy)
- Docker

Development

- Python (Flask, FastAPI, Django)
- JavaScript (React, React Native)
- HTML, CSS

Tools

- SQL, SQLite
- Git, Gitlab & Github
- Jira & other ticket management systems

Languages:

- English:
 - Reading, writing, and listening: C2 EF SET [Certificate](#)
 - Speaking: B2/C1
- Spanish: Native

Studies

Information Systems Analyst - National University of La Plata (In progress)
